

Dariusz Mikulski, Ph.D. is a Lead Research Scientist for Ground Vehicle Robotics (GVR) in the US Army DEVCOM Ground Vehicle Systems Center (GVSC). He has been with GVSC for 21 years and is dedicated to improving cybersecurity, artificial intelligence (AI), and cooperative teaming in robotic and autonomous systems (RAS). Dr. Mikulski leads GVR's Hybrid Autonomy & Cybersecurity Research (HACR) Laboratory to study and solve issues at the intersection of vehicle autonomy and cybersecurity; and has served as the Technical Manager for the Cybersecurity for Robotic & Autonomous Systems Hardening (CRASH) Joint Capability Technology Demonstrator (JCTD). He has been awarded the Army's Meritorious Civilian Service Medal (2022) and Civilian Service Commendation Medal (2021) for exemplary service and excellence for his work in robot cybersecurity. Dr. Mikulski earned his Ph.D. in Electrical and Computer Engineering (2013) at Oakland University in Michigan. He also earned his BSE in Computer Science (2003) from the University of Michigan (Ann Arbor) and master's in computer science and engineering (2006) from Oakland University. Dr. Mikulski has been a NDIA-Michigan member since 2007 and has continued to support the NDIA Cyber Physical Systems Security Summit as a planning committee member since its inauguration in 2016.
