Jeff Massimilla

Vice President, Global Engineering & Technology

Jeff Massimilla became Vice President of Global Engineering & Technology at General Dynamics Land Systems in January 2024. He is responsible for the leadership, strategic vision, resource management and execution of all global activities within engineering, advanced products and technology.

Jeff previously served as Land Systems' Vice President of Global Engineering Project Management and Chief Information Officer. Before joining Land Systems, Jeff held positions of increasing responsibility over 21 years at General Motors (GM), culminating as the Global Vice President of OnStar Safety and Connectivity. Jeff also served as the Vice President of Global Vehicle Safety, Global Vice President of Connected Customer & Mobility Solutions, and Vice President of Global Cybersecurity during his career at GM.

Jeff has served on boards including Intelligent Transportation Systems America, the University of California-Berkeley College of Engineering Advisory Board, and Auto-ISAC.

Jeff holds a bachelor's degree in electrical engineering, a master's degree in industrial and manufacturing engineering and a Master of Business Administration degree, all from the University of Michigan.
