As a non-profit organization, the NDIA Michigan Chapter has a limited amount of funding available to support requests. Sponsorship requests will be evaluated using several criteria including students' ages, number of students impacted, STEM committee's assessed value of the event, and overall mix of NDIA Michigan Chapter's support for STEM events for the fiscal year. While all events may be worthwhile to support, support for all requests may not be possible

Thank you for your interest and support of our nation's young people in pursuing STEM careers!
