

**Are you a teacher or do you know a teacher that would be interested in adding STEM to their curriculum?**

We are piloting a project this year to bring STEM KITS into the classroom. We are looking for 4<sup>th</sup> - 6<sup>th</sup> grade teachers who would be committed to adding STEM related material to their curriculum. We have found that most of our STEM scholars get interested during these formative years and suggested we work to introduce STEM early in education.

We are piloting up to 7 classrooms this first year and will provide STEM Kits which come with lesson plans and volunteers to help with the first lesson in the classroom. These kits will stay with the teacher so they can continue to be used year after year to help grow STEM scholars in Michigan

If you are interested or know a teacher who is interested, please have them send an email to [stem@ndia-mich.org](mailto:stem@ndia-mich.org)
